

# HOW ACCENTURE EMPLOYEES ARE TACKLING SOME OF THE WORLD'S GREATEST SOCIAL & ENVIRONMENTAL ISSUES

## VIDEO TRANSCRIPT

The only things greater than the problems we face is our ability to change and solve them. Accenture's Sustainability Innovation Challenge seeks out solutions through a competition in which ultimately, all of us win.

From across 35 countries ...

Hello, welcome everybody!

Congratulations teams!

If we're not the ones that are creating the solutions to solve climate change, then who will?

We are here to show you the future of climate action education.

By 2025, digital will account for 8% of overall CO2 produced globally and the solution is environment CO2T.

We're excited to present a solution for solving future water crisis.

By providing the right tools, we can empower farmers at scale.

TIST is a locally led tree planting model that has sequestered more than 9 million tons of carbon.

The future is literally in our hands.

Our team came from four different countries, lots of different nationalities, working across different parts of Accenture to bring this vision to life.

Our subject matter experts from all around the world.

Getting all those perspectives and ideating for such a good cause. I think that's a lot of fun.

We all have the power to be the ones that can make a change.

That's a perfect segue for you guys to congratulate yourselves!

I would like to thank my team, Braintrust experts, coaches.

We're grateful to have come this far and really appreciate the support.

Very well done, you have inspired all of us.

You guys should be incredibly proud.

We are truly impressed by all of your Innovations.
